**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-19, drawn to an optical recording apparatus, method or recording and product thereof, classified in class 36<sup>9</sup>, subclass 94
  - II. Claims 120-24, drawn to method of manufacturing a multilayered record medium, classified in class 430, subclass 22.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process of making and product & apparatus for recording thereon. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product can be made by a materially different process, that of molding two separate discs together.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Also, because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. Due to the divergence of the above noted inventions, no telephone call was made to request an oral election to the above restriction requirement.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is given one month within which to respond to this requirement.
